

GAS SAMPLING SYSTEM

TRITECH make Sampling System is specially designed to measure gas samples from extreme/harsh conditions with either Temperature, Moisture or Pressure challenges. Depending upon availability of utilities Air Aspirator or Electrical pump type system can be used. Air Aspirator type uses compressed air to draw sample. Special particulate Filters, Moisture Traps and Sample Temperature Conditioners are used to enhance the accuracy & life of Gas Detectors. TRITECH Sampling System can be integrated with any TRITECH Detector / Transmitter unit.

FEATURES

- Single or multiple sensor
- Simple to Operate
- Air Aspirator type or Electrical pump type
- Corrosion resistant construction for extreme location
- Modular design, easy to Maintain
- Separate inlet port for calibration (one man Calibration)
- Flow fail Alarm (Optional)

Note: Detail Specification on request.
